PROJECTS

Antisleep Detection and Alarm System

02 Feb, 2024 - 05 May, 2024

Team Size: 4

Key Skills: C Microcontroller Arduino

Antisleep detection technique is used to determine whether the driver is in perfect condition of driving or is drowsy,sleepy which might cause potential accident. Basic infrared sensor technology is used as the base working principle.

Library Management System

01 Sep, 2023 - 30 Nov, 2023

Team Size: 4

Key Skills: MySQL HTML JavaScript PHP

Library management system uses PHP and MySQL in a web based application. This project has many features that are generally not available in normal library management system, like the facility of user login and the facility of adwin login. The admin login console is the control of the entire management system and monitors the whole system. It also has a facility where students after login in to their accounts can see a list of books issued, there issue date and their return date
